

## ~Our Commitment to Our Patients ~

We believe that all individuals deserve comfort.

We believe that human beings have a right to live and die with dignity.

We believe that people should not die alone nor be alone in their grief.

We believe that each person is a unique individual and we honor the life experiences, approaches, and beliefs of all.

We believe that being with the dying and their loved ones is a gift unlike any other.

We believe that we are all called to be agents of peace and comfort.

We believe that quality, compassionate hospice care is an important part of the well-being of our community and our mission is to fulfill that role.

We believe in giving back to and caring for our community because of the kindness, support, and respect we receive here.

We believe providing deeply kind, professional, and expert care for our patients and families adds something of value to our neighborhoods, community, and world.
